

**CLIENT:** Consumer    **LOCATION:** Global    **APPLICATION:** Residential Energy Storage

*Above: 20 OES2 Smart-Tech Energy Storage Batteries provide 52kWh of power*

**SIMPLIPHI POWER** offers a portfolio of non-toxic, efficient, energy dense power storage and management solutions that seamlessly integrate renewable energy in conjunction with or independent of the grid.

Without energy storage, renewable sources of power are intermittent and unpredictable, as is the grid in emergency and blackout scenarios in which the centralized delivery of power breaks down. SimpliPhi technology creates power security and resilience by taking the intermittency out of any source of power generation, including the centralized grid, fuel-based generators, wind and solar.

- Net zero, peak shaving and back-up power for homes and businesses
- 98% charge/discharge efficiency rate
- 5000+ cycles
- 10 year warranty
- Extended operating temperature -4° to 140°F
- Supports energy cost, time-of-use and demand charge management
- Immediate access to power where critically needed, including expeditionary and portable applications  
Compatible with all inverter/charger systems
- Drop-in replacement AGM Gel and SLA lead acid batteries Net zero homes and businesses

**Power. On Your Terms.™**
