SIMPLI PHI™
Battery

BRIGGS & STRATTON

The **Simpli PHI™ 4.9 kWh Battery** utilizes advanced Lithium Ferro Phosphate (LFP) chemistry to deliver more efficient, safer and reliable energy storage. Designed and built with versatility in mind, the Simpli PHI 4.9 kWh Battery seamlessly integrates with all leading inverters, making it an ideal solution for battery replacement, expansion of existing systems or as a new installation. This leading-edge power storage solution is also at the core of the Energy Storage System (ESS): the most advanced, safety-certified ESS available for homes and businesses.

FEATURES

Long battery life

10,000 cycles at 80% depth of discharge (DoD), 96% round-trip efficiency, 38.25 MWh of energy throughput, with 80% retained capacity.

Scalable for any energy need

Battery can scale to allow for expansion up to 72 batteries (358 kWh) for longer-duration storage.

Flexible to pair with leading inverters

Ready to be integrated with Simpli PHI, Sol-Ark and SMA. Other inverters pending.

LFP battery chemistry

Provides peace of mind that your batteries do not include cobalt, mitigating the risk of thermal runaway with fire propagation, operating temperature constraints and toxic coolants.

Broad operating temperature

Ability to be used in a variety of temperature ranges.

Maintenance-free

No ventilation, cooling or thermal regulation required; 10-year limited warranty.¹

Versatile installation options

IP65 rating supports all weather conditions for both indoor or outdoor installations.

Validated to industry's toughest safety standards

UL 1642, UL 1973, UN 3480, UN DOT 38.3, UL9540A (pending).

Closed-loop communication

Optimizing the inverter performance with ongoing feedback between the components of the system.

Proven overcurrent protection

Integrated BMS and 100A DC breaker on/off switch protects the battery from overcharge and discharge, increasing safety during installation and operation.
